

FIT-580- Tópicos em Pesquisa e Inovação em Fisioterapia do Trabalho e Ergonomia
06 Créditos –Carga horária – 90 hs

Docentes responsáveis: Prof^a. Dr^a. Ana Beatriz de Oliveira, Prof^a. Dr^a. Tatiana de Oliveira Sato

Ementa:

A disciplina abordará os principais referenciais teóricos e metodológicos da Fisioterapia do Trabalho e Ergonomia, Prática Baseada em Evidências Científicas, aplicações e inovações nestas áreas. Dentro desta abordagem, serão discutidos assuntos relacionados aos projetos de pesquisa dos estudantes matriculados na disciplina, com ênfase na discussão crítica de artigos científicos publicados em periódicos de alto impacto, que embasem os projetos em construção e/ou desenvolvimento.
